

Lake Nocona Yacht Club Tequila Shots

At the Yacht Club, we do not believe it to be good form to mar the flavor of a good tequila with salt or lemon/lime. So, we limit our options to brand, shot size, and tequila temperature.

Select your tequila. Some of our favorite brands include Patron, Republic of Texas, Don Julio, Corazon, Milagro, and Herradura. This list is not complete by the way. We prefer anejo tequilas, but we certainly drink blancos and reposados. We also found a mezcal we very much enjoy, El Senorio Reposado Extra. We consider the substitution, or inclusion, of a good mescal in our rounds of shots to be particularly good form.

Our shot sizes are regular and child's portion. We will have regular shot sizes when we know we will have limited shots over a short period of time. If the evening seems destined to be several hours long, or if we have more than one brand to enjoy, we will savor our shots with half shots, i.e. child's portions.

Most of our shots are taken at room temperature, but for variety, we also enjoy our bottles chilled in the freezer for an hour or two or more. Room temperature or chilled, tequila is a local favorite of our parties.
